Cautionary Use Hospitals by Year	15
Hospital Charge & Discharge Totals by Quarter & by Fiscal Year	16

OVERVIEW

The Division of Health Care Finance and Policy collects case mix and charge data for all inpatients discharged from Massachusetts acute care hospitals. The collection of data is mandated by **Regulation 114.1 CMR 17.00**: “Requirement for the Submission of Hospital Case Mix and Charge Data”. The Inpatient Hospital Discharge Database contains comprehensive patient-level information, including socio-demographics, clinical data, and charge data. The hospitals report data to the Division on a quarterly basis for the fiscal year beginning October 1st. The Division creates a yearly database, which is available to the public through the Division’s application process.

This Manual summarizes five years of hospital discharge data submissions for Fiscal Years 2000, 2001, 2002, 2003, and 2004. The five-year summary contains only basic information about the database. It is intended for experienced users of the DHCFP data, or users analyzing multiple years that might need only basic yearly database information. The Summary data consists of the following tables:

- a) Hospital Responses by Year, including Hospital Reported Discrepancies and Hospitals with No Verification Response Report
- b) Cautionary Use Hospitals by Fiscal Year;
- c) Hospital Charge and Discharge Totals by Quarter & Fiscal Year

New users, and/or those requiring more detailed information, should consult the yearly documentation manuals. The yearly manuals include information on database development, grouper methodology, data elements, error categories, the verification report process, and individual hospital-reported discrepancies in response to the data verification process. The yearly manuals also contain the discharge and revenue file tables, data code tables, and supplementary information, including alphabetical and numerical payer source lists.

Since the Hospital Discharge Data is not static, hospitals continue to submit and resubmit updated data throughout the year until the Division has closed out the fiscal data year. Yearly data is validated by hospitals. Validation occurs at the end of the fiscal data year during the Verification Process. Quarterly submissions are processed through electronic quality checks for compliance with regulatory requirements and can pass or fail based on those quality checks during quarterly data submissions. However, at the close of the Division’s fiscal data year, hospital contacts review and verify summary reports containing the final submission information for their hospital. The hospital contact reviews the information for accuracy and can resubmit corrected data or note any discrepancies found in the reports. All discrepancies and hospital comments are included in the detailed yearly documentation provided for users of the complete year-end Hospital Discharge Data. Only limited information concerning the discrepancies is included in the 5-year summary.

Copies of Regulation 114.1 CMR 17.00: Requirement for the Submission of Hospital Case Mix and Charge Data and Regulation 114.5 CMR 2.00: Disclosure of Hospital Case Mix and Charge Data may be obtained by logging on to the Division’s web site at <http://www.mass.gov/dhcfp/>.

HOSPITAL ADDRESSES, DPH ID, ORG ID & SERVICE SITE ID NUMBERS

This section contains a list of hospital names, addresses (for the physical location of the hospital), and unique identification numbers. The Organization ID and the DPH ID are unique numbers assigned to each hospital by the Division and the Department of Public Health, respectively, to allow for easy identification of the facility on the database. The facility site number is an assigned number used to distinguish multiple sites that fall under one DPH number.

Hospital Organization ID

A unique facility number assigned by the Division, to identify the main hospital organization.

Hospital Filing Org ID

The number under which the hospital files data.

DPH Number

The Massachusetts Department of Public Health’s four-digit identification number.

Facility Site Number

A hospital determined number used to distinguish multiple sites that fall under one Massachusetts Department of Public Health (MDPH) facility number. It is the ID number for the site where the service took place.

HCF CALCULATED FIELDS

This section contains a brief description of fields which are calculated by the Division, based on data submitted from the hospitals, and included in the yearly database.

Age Calculation – Age is calculated by subtracting the date of birth from the admission date. If dates are invalid, ‘999’ is placed in this field.

Newborn Age - Newborn age is calculated to the nearest week (the remainder is dropped) – subtracting the date of birth from the admission date and dividing by 7. Thus, newborns zero to six days old are considered to be zero weeks old. Discharges that are not newborns (>1 year old) have ‘99’ in this field.

Preoperative Days – Preoperative days are calculated by subtracting the patient’s admission date from the surgery date. Preoperative days are set to 0000 when there is no procedure date, if the procedure date or admission date is invalid, or if the procedure date occurs after the discharge date. Other values in this field mean: 0 = procedure performed on the day of admission; 1 = procedure performed day after admission; -1 = procedure performed day before admission.

Length of Stay (LOS) Calculation – Admission date is subtracted from the discharge date and then Leave of Absence Days are subtracted from the total. If the result is zero (for same day discharges) then the value is changed to 1. If either date is invalid, length of stay = 0. Days are accumulated a year at a time, until both dates are in the same year. The difference is added (or subtracted) to give the correct LOS.

Unique Health Information Number (UHIN) Visit Sequence Number - The sequence number is calculated by incrementing a counter for each UHIN’s set of admissions. Sequence Number is calculated by sorting the entire database by UHIN, admission date, then discharge date (both dates are sorted in ascending order). If the UHIN is valid, the sequence number is calculated by incrementing a counter from 1 to nnnn, where a sequence number of 1 indicates the first admission for the UHIN, and nnnn indicates the last admission for the UHIN. If a UHIN has 2 admissions on the same day, the discharge date is used as the secondary sort key. If the Unique Health Information Number (UHIN) is undefined (not reported, unknown or invalid), the sequence number is set to zero.

Days Between Stays – For UHINs with two or more admissions, the days between stays is calculated by subtracting the previous discharge date from the current admission date. If the previous discharge date is greater than the current admission date or the previous discharge date or current admission date is invalid (i.e., 03/63/95), DAYS BETWEEN STAYS is set to ‘9999’ to indicate an error.

TABLE 1. HOSPITAL DISCREPANCIES OR ISSUES

Hospital discrepancies or issues are reported by the hospitals to the Division and/or identified by the Division during the data verification process, for each data submission year. Blank boxes indicate no discrepancies or issues for the period in question.

Hospital Name	ID Numbers	2000	2001	2002	2003	2004

2. CAUTIONARY USE HOSPITALS BY YEAR

Cautionary use hospitals are those which the Division did not receive four quarters of acceptable discharge data, as specified by the 114.1 CMR 17.00 Regulation. The following table lists the cautionary use hospitals and reason(s) for failure, for each fiscal year.

FY2000		
(Cautionary Use Hospitals as of the April 2002 data release)		
Hospital	Cautionary Use Quarters & Reason	Acceptable Quarters
Wing Memorial	Q1: Total charges accommodations did not equal sum of Total Charges Special Services and Total Charges Routine Services	2, 3, 4
Vencor-Boston	Q4: Supplementary codes used in Primary Source of Payment Invalid codes used in Secondary Source of Payment	1, 2, 3
Vencor-No. Shore	Q4: Total Charges Ancillary did not equal Total Charges for Service	1, 2, 3

FY2001		
Hospital	Cautionary Use Quarters & Reason	Acceptable Quarters
Kindred – Boston	Did not file tape for Q4.	1 & 2
Kindred – No. Shore	Q3 & Q4: Invalid Accommodation Revenue Codes	1 & 2

FY2002		
No cautionary use hospitals for FY2002. All hospitals submitted 4 quarters of acceptable data.		

FY2003		
No cautionary use hospitals for FY2003. All hospitals submitted 4 quarters of acceptable data.		

FY2004		
No cautionary use hospitals for FY2004. All hospitals submitted 4 quarters of acceptable data.
